Objective

I am a fast-learning, versatile Front-End Web Developer. Self-driven and eager to use my skills and experiences to design, develop, and manage websites, applications, and programs. I seek to secure a position at a company that isn't satisfied with being a follower of current trends, but instead desires to be an innovative driving force.

Skills, Languages & Frameworks

Proficient:

- HTML5, CSS3, Vanilla JavaScript, Git, GitHub, jQuery, Responsive Design/Bootstrap, Wordpress

Experienced:

- PHP, C++, JAVA, NodeJS, AngularJS, VueJS, D3JS, ReactJS, LESS/SASS, JSON APIs

Professional Experience

Front-End Web Developer, [August 2018] – [Present]

Demand Boost Inc, San Jose, CA

Responsibilities:

- Designed, developed and launched multiple online platforms for a wide range of business including medical practices and law firms.
- Built mobile friendly, responsive, and cross-platform websites, using HTML5/CSS, PHP, and Wordpress.
- Resolved design issues through root cause analysis and performed data cleanup.
- Managed servers hosting client websites, using cPanel to manage domains, SSL certifications, and any revisions made to client websites.
- Coordinate with team of content developers on integration of blogs and newsletters.
- Coded websites to fit current SEO standards to increase clients Google rankings.
- Upgraded older websites with more effective marketing design elements, resulting in an increase in Lead conversions.
- Designed and launched marketing campaigns using MailChimp, StampReady, and Click Funnel.
- Create images, icons, banners, videos, and other features of the website utilizing Adobe Suite of applications, such as Photoshop, Illustrator, and Premiere.

Front-End Web Developer, [May 2018] – [Present]

Freelance, San Jose, CA

Responsibilities:

- Building portfolios for local businesses and artists.
- Photoshop Design conversion into working HTML, CSS, JS websites.
- Navigated, cleaned, and optimized the code of previously established websites to decrease load times and create smoother user-experiences.
- Managed wordpress pages, uploading blogs and newsletters.
